Adama Science and Technology University

june 2021 - june 2025

Adama , Ethiopia

Projects

TeachTrack : Teachers Circulation management System

is a comprehensive platform me and my team developed to streamline the management and circulation of teachers' information and schedules. Built with ReactJS for the frontend, Node.js with Express.js for the backend, and PostgreSQL as the database

Organization Portfolios

i have developed various organizational portfolios and websites using a range of technologies, including ReactJS, Node.js, Laravel, Express.js, MySQL, and PostgreSQL. With a passion for creating dynamic and responsive digital solutions

Hotel Management System

I developed a hotel website using ReactJS for the frontend, Laravel for the backend, and MySQL for the database. Skilled in full-stack development, I create user-friendly and efficient web applications.

Experience

Fullstack Development

2022-2024

Qelem Meda Technologies

Job Portal System

During my internship, I developed a job portal system using Vue.js for the frontend, Laravel for the backend, and MySQL as the database. I enjoy creating efficient, user-friendly platforms and continuously improving my skills in full-stack development.

Task Management System

and also as an intern , I developed a Task and Project Management System, utilizing Vue.js for the frontend, Laravel for the backend, and MySQL for the database. This project enhanced my skills in full-stack development and provided me with practical experience in building efficient, user-friendly management tools.
